SUMMARY

Data Engineer with 5+ years of experience designing and optimizing scalable data pipelines on cloud data platforms. Proven impact in improving performance and reliability. Achievements include reducing data processing time by 25% and lowering storage costs by 15% through optimized ETL pipelines and Snowflake architecture. Experienced in Databricks, Apache Airflow, and data governance, with a strong focus on building reliable, high-quality data systems.

SKILLS

- Data Engineering & Orchestration:** Apache Airflow, Apache Kafka, dbt, DataHub, ETL/ELT pipelines, Workflow Automation
- Big Data Processing:** Apache Spark, Kafka Streams, Batch & Real-time Processing
- Data Warehousing & Modeling:** Snowflake, BigQuery, Redshift, Dimensional Modeling, Schema Design
- Cloud Platforms:** AWS(S3, EC2, Redshift, Glue), Azure, GCP, Databricks
- Data Quality & Governance:** Great Expectations, Data Lineage, Data Observability, Data Freshness Monitoring
- Programming & Databases:** Python(Pandas, NumPy, matplotlib), SQL, PostgreSQL, MongoDB
- Analytics & Reporting:** Tableau, Power BI, Dashboarding, KPI Tracking
- AI/ML & Agentic Systems:** Agentic AI, LLM Applications, RAG, Prompt Engineering

PROFESSIONAL EXPERIENCE

United Health Group | Data Engineer Jan 2026 - Present

- Engineered and optimized robust ETL pipelines using Python, SQL, and Airflow, reducing critical healthcare data processing time by 25% for HIPAA-compliant datasets.
- Developed ingestion workflows integrating HL7/FHIR feeds with automated quality checks, improving data consistency by 15% for downstream analytics.
- Designed and implemented Snowflake-based healthcare data marts (patient, provider, claims) enabling faster clinical and operational reporting.

Qualcomm | Data Engineer Oct 2021 - Nov 2024

- Architected scalable data architecture and data modeling for Snowflake data warehouse solutions for 10TB+ datasets, reducing storage and compute costs by 15%.
- Developed real-time data ingestion pipelines for HRIS systems using Apache Kafka, decreasing data freshness gaps by 40% for business intelligence needs.
- Led the creation of data collection frameworks for structured and unstructured HR data, solving complex data problems to generate features required by data scientists.

Hexaware | Associate Data Engineer Jan 2019 - Sep 2021

- Designed and optimized data ingestion strategies and ETL/ELT data transformation, improving throughput by 20% and supporting 50+ downstream consumers.
- Implemented Apache Airflow orchestration, raising pipeline success rates to 95% and reducing operational overhead.
- Established data governance policies and quality standards across engineering teams, driving a 25% reduction in data issues and improved compliance.
- Collaborated with cross-functional teams to build KPI dashboards that improved visibility and performance tracking across departments.

EDUCATION

Clark University May 2026
Master of Science, Data Analytics Worcester, MA

Biju Patnaik University and Technology Jun 2018
Bachelor of Technology, Computer Science & Engineering Odisha, India

CERTIFICATIONS

- Microsoft Certified: Azure Data Fundamentals (DP-900)
- Google Certified: Google AI Essentials
